

Marvel Develops Academy

8-WEEK AI & CODING BOOTCAMP CURRICULUM

The complete 8-week programme. Every topic is there because you will use it to build real, deployable projects. No abandoned theory.

WEEKS 1-2

Web Foundations

- HTML, CSS, JavaScript fundamentals
- Git & GitHub basics
- Terminal / command line basics
- Deploying a static site to Vercel with a custom domain

PHASE OUTCOME

Build and deploy your first live website.

WEEKS 3-4

Full-Stack Development

- JavaScript deep dive: DOM, fetch/APIs
- Node.js basics
- One backend framework (Express)
- One database, CRUD operations
- Deploying a full-stack app

PHASE OUTCOME

Build and deploy your first working app with a backend.

WEEKS 5–7

AI-Powered Development

- AI models & APIs overview
- Prompt engineering fundamentals
- Claude Code hands-on (setup, workflows, real usage)
- Automating tasks with Claude Code
- Claude Skills & MCP (Model Context Protocol) — conceptual + light hands-on
- Capstone project build (spans into week 7)

PHASE OUTCOME

Ship a real project using AI-assisted development tools.

WEEK 8

Portfolio & Launch

- Finish and deploy capstone project
- Build a personal portfolio site
- Resume / LinkedIn / GitHub presence
- Storytelling: how to talk about your work to employers/clients

PHASE OUTCOME

Leave with a live portfolio and a project you can show anyone.
